## Benefit of LED Lighting

### High performance luminous flux

More brightness than traditional lights.

### Tremendous Energy Efficient

%40- 70 energy saving when compared to traditional bulbs.

### Long Life Time

Life- span up to 12 years which equivalent 50, 000 hours. Unlike traditional light bulbs, LED is not fragile to breakage or vandalism.

### Environment Friendly

Ultra- Violet (UV) % InfraRed (IR) free, no hazardous materials and less disposal waste.

### CO2 Discharge Reduction

Potentially reduce 50% less of CO2 discharged.

### Improved visibility

No glare or strobe effects.

### Revolutionary photometric design

Excellent uniformity beam pattern.

### High color index

Unique color index providing a bright and true colors during night time hours.

### Instant start

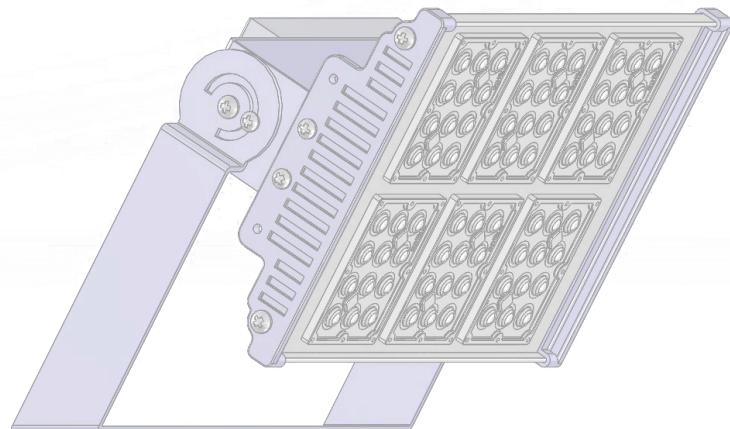

Unlike sodium light, LED do not require a time delay to reach optimum brightness levels.

### Easy to automation control

# LIGHTING POLES

## POLYGONAL AND ROUND CONICAL POLES

Lighting Poles be able to manufactured polygonal and round conical.

Lighting Poles have arms between 1-4.

Products are hot dip galvanized in accordance with international standards (EN 1461)

Electrostatic powder painting available use on galvanized surface.

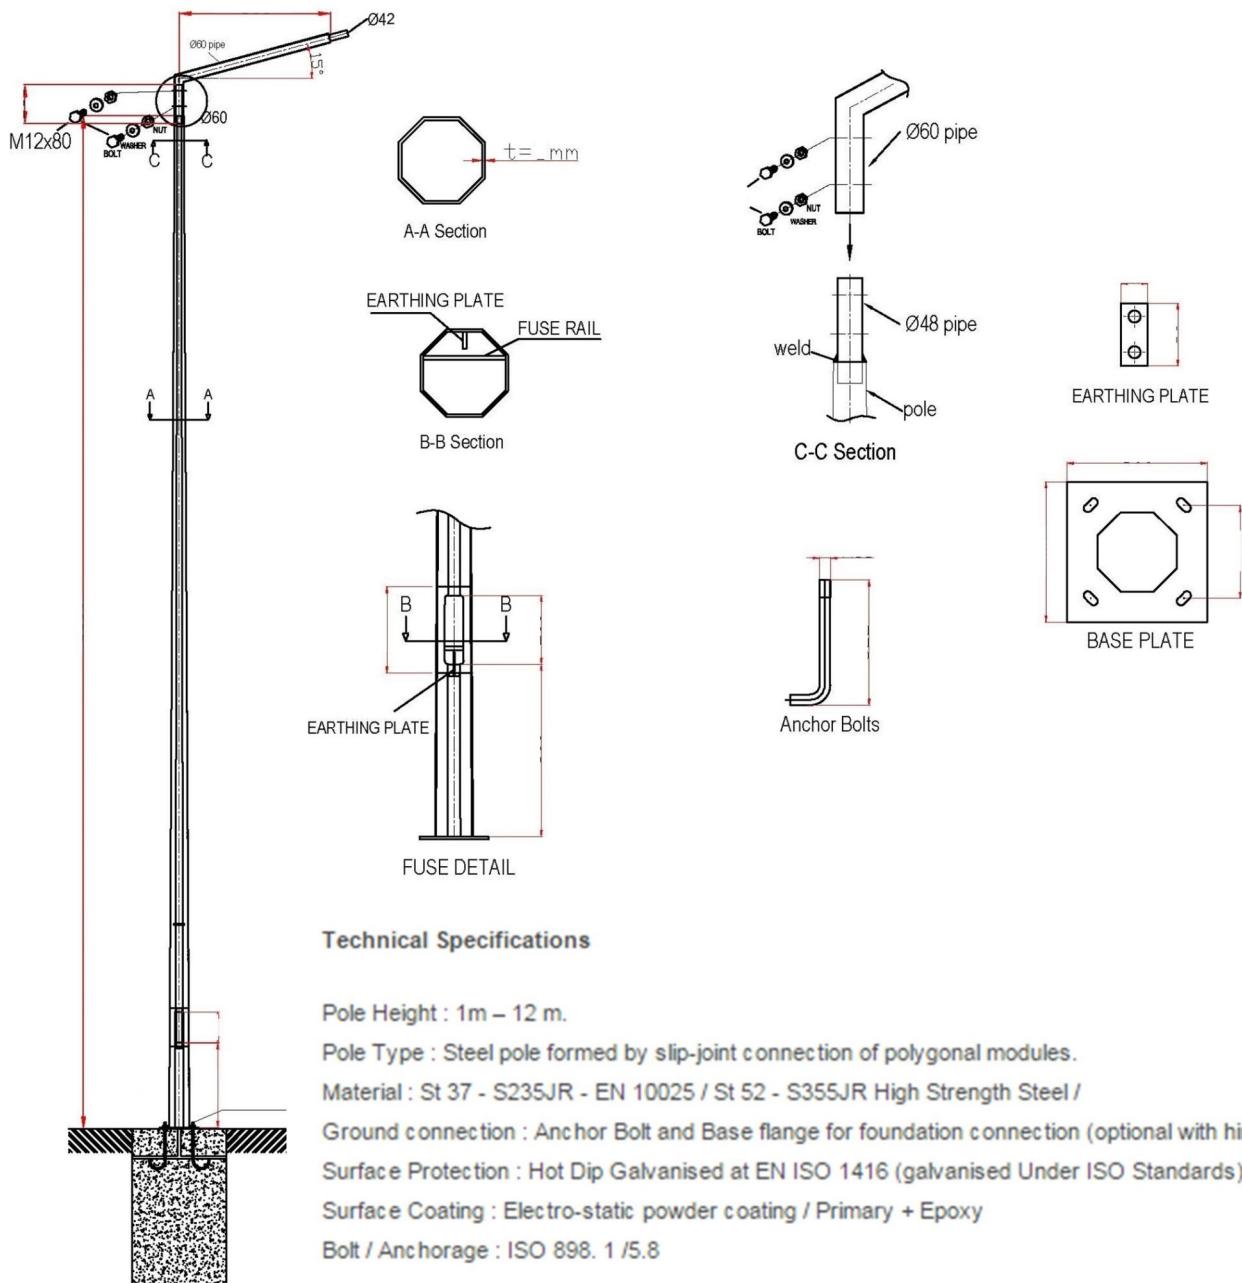

Different Type of arms can be produced.

**Optik Lighting Poles are designed according to customers demands**

**Pole Design is made according to customers specification.**

#### Technical Specifications

Pole Height : 1m – 12 m.

Pole Type : Steel pole formed by slip-joint connection of polygonal modules.

Material : St 37 - S235JR - EN 10025 / St 52 - S355JR High Strength Steel /

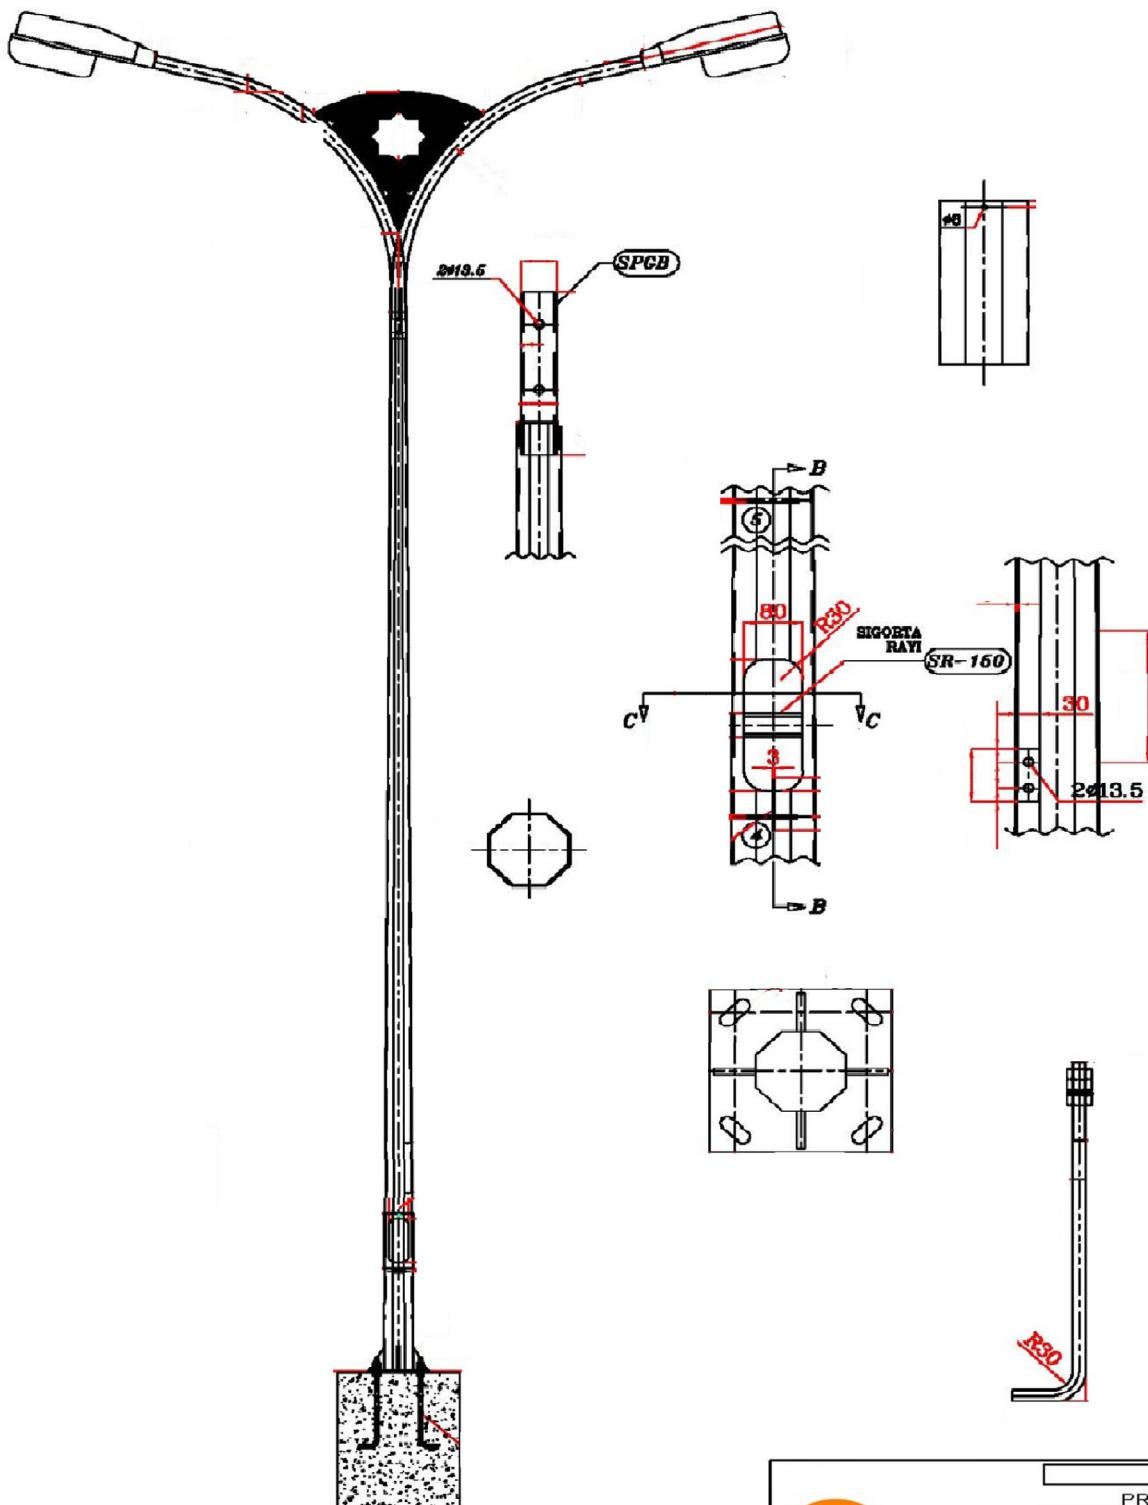

Ground connection : Anchor Bolt and Base flange for foundation connection (optional with hinge- up to 8m).

Surface Protection : Hot Dip Galvanised at EN ISO 1416 (galvanised Under ISO Standards)

Surface Coating : Electro-static powder coating / Primary + Epoxy

Bolt / Anchorage : ISO 898. 1 /5.8

## ALPINE TYPE 1

### KEY FEATURES

- Corrosion resistant cast aluminium body & base
- Galvanized and Electrostatic powder painting
- Stainless Steel Screws
- Weather proof and durable silicone caps
- Compatible 250W-400W or LED Lighting
- IP 54

## ALPINE TYPE 2

### KEY FEATURES

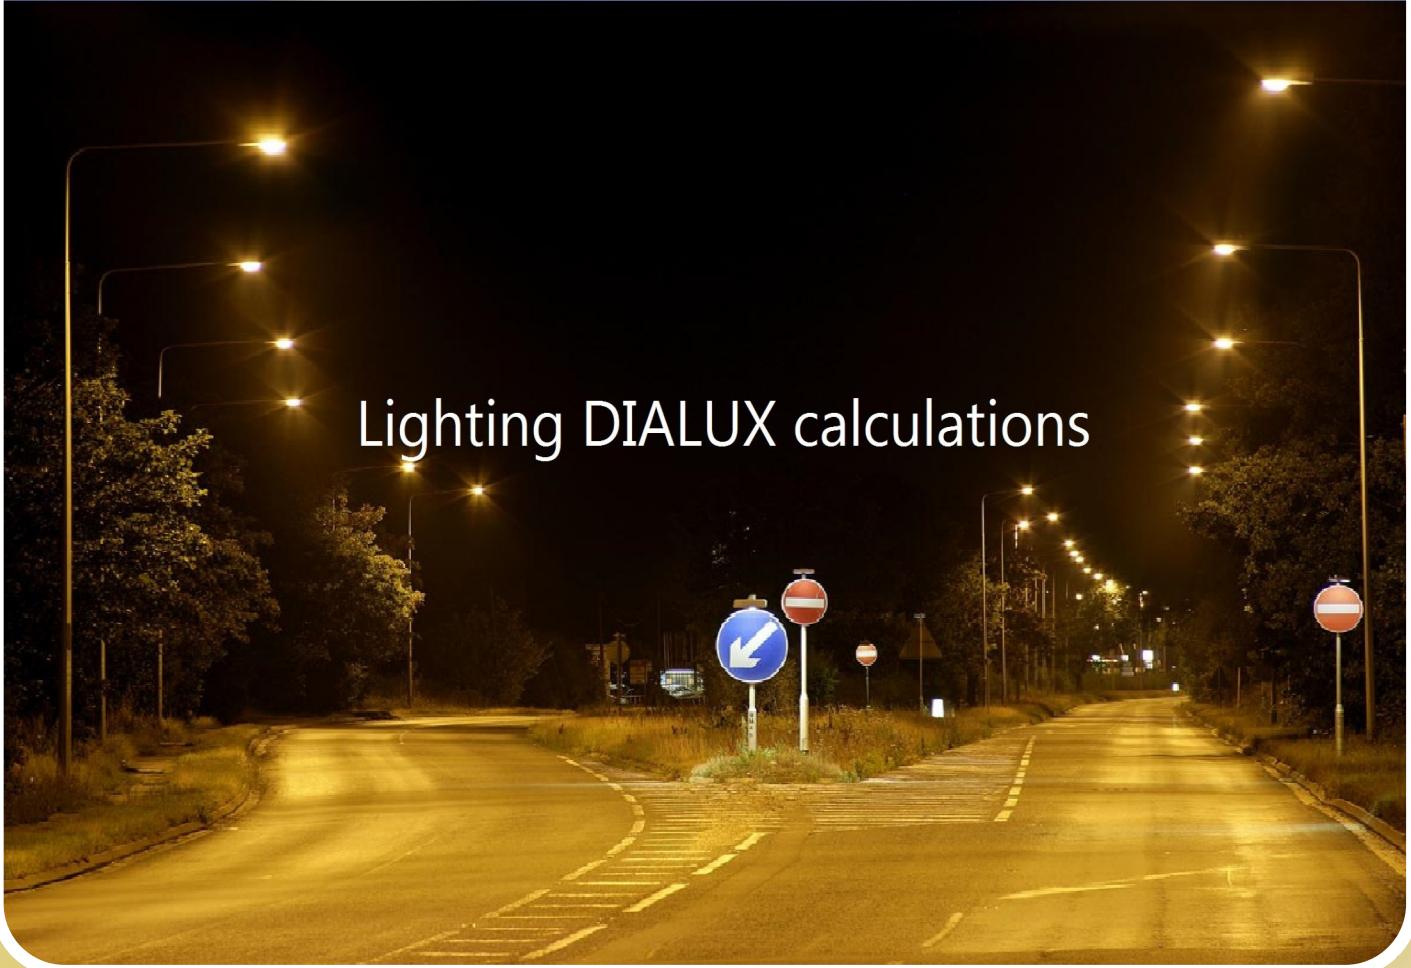

- Corrosion resistant cast aluminium body & base
- Galvanized and Electrostatic powder painting
- Stainless Steel Screws
- Weather proof and durable silicone caps
- Compatible 250W-400W or LED Lighting
- IP 54

Lighting Poles with curved from body

Polygonal and round arm solutions

3D Modelling

Foundations reports for concrete

Lighting Poles with no arm

# SOLAR SYSTEM POLES

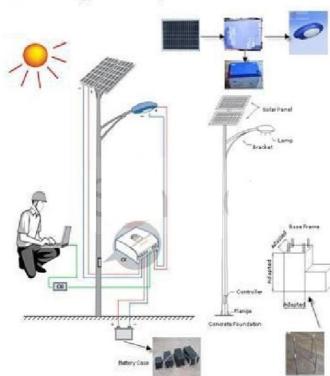

## KEY FEATURES

- Energy saving up to %80
- No electricity consumption
- Maximum safety from electricity shock
- No excavation
- No power line maintenance
- No electric distribution networks
- No black out problems
- Very low installation cost comparing the conventional system.
- No CO2 emission
- Availability to reconfigure to pole position
- Availability to use 3 days energy
- High Quality Gel Batteries
- 10 years Battery life time
- 20 years Solar Pannel life time
- High quality Control Box with electro galvanize with electro static painting.

### Working Principle:

of road importance class

## ELECTRICAL COMPONENTS

-Fuse: 1x25A  
(For Each Floodlight)

### TECHNICAL SPECS:

- Smc , Produced from Glass Fiber and ve Polyester mixture.
- Noncorrosive and Incorruptile
- Resistant to atmospheric conditions.
- Non Electrical Conducting
- Resistance from dust and water by using rubber.
- Colourable to any.
- Easy to install due to lightness
- Resistance of heat and impact
- Resistance to acid
- Pannel: 250x300x150mm
- Pannel Weight: 10,6 kg

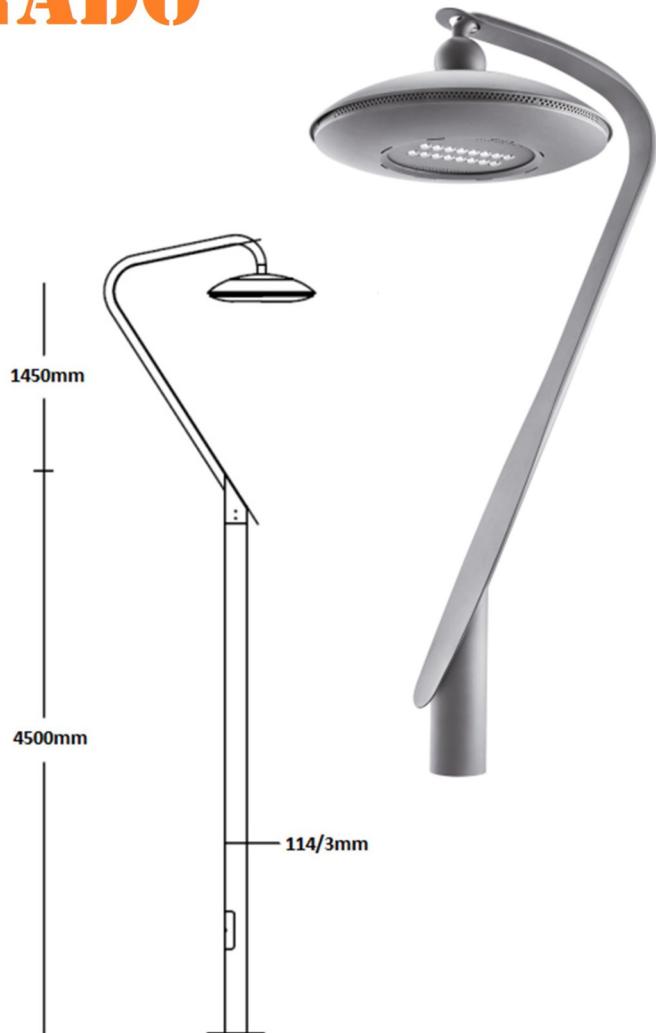

# **DECORATIVE & ARCHITECTURAL LIGHTING**

# TORNADO

## KEY FEATURES

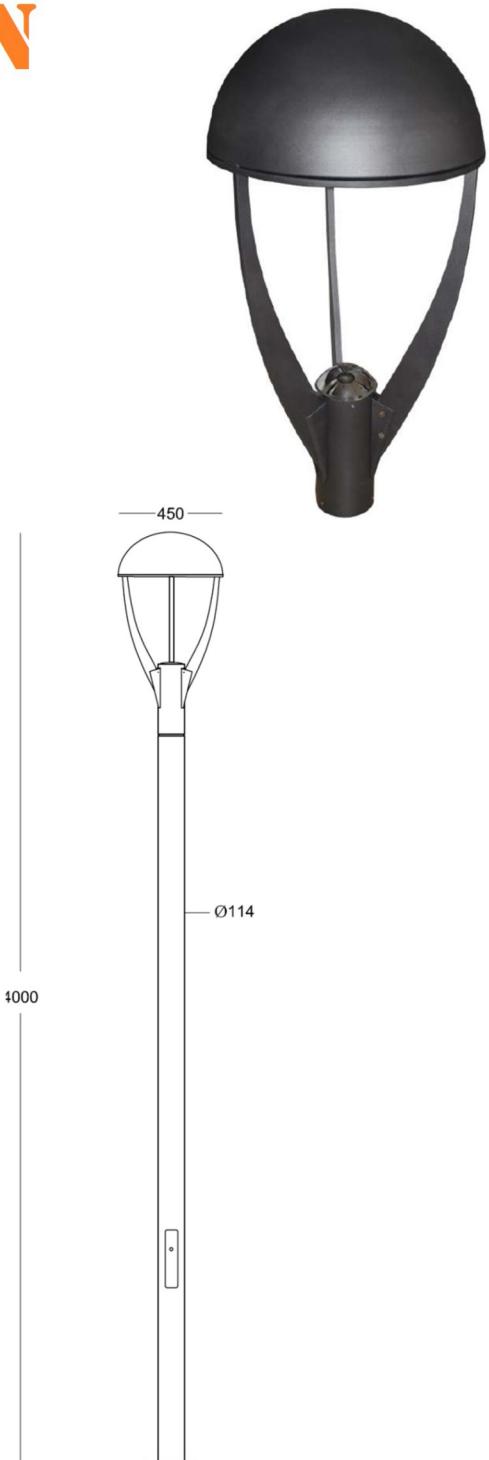

- Aluminium Injection Body
- Stainless steel bolts. Long lasting silicone rubber.
- Light weight body design.
- Special air passages to distribute heat in harmonic. Natural ventilation.
- High energy saving, low maintenance costs.
- 1-10V Dim/Stand Alone or BI-POWER technology working system, 220/240V - 50-60Hz
- Modular LED System
- 3500 and 4000 Kelvin light option.
- Optionel convantionel to use HID bulbs, 45-60-90W.
- Electric Protection Class: "CLASS II"
- IP Class: IP66
- ENEC Certificate.
- Pole Height: 4500mm – 6000mm

# NEPTUN

## KEY FEATURES

- Aluminium Body.
- Stainless Steel Bolts.
- Long life silicone rubber.
- Internal connections provided by silicone armed cables having resistant to heat.
- IP 68 Stainless Sleeve inside of fixture to resist corrosion by leaktightness.
- Easy to maintenance by gate with locked and hinged.
- All components have CE, VDE, ENEC certificates.
- Tempered glass resist heat and impacts.
- Homogenous light distribution by high efficient light and special designed reflector.
- 70-150W Metal Halide and Sodium and **24-36 Power LED can be used.**  
G12 ve E40 lamp holder.
- Electric Protection: "CLASS I"

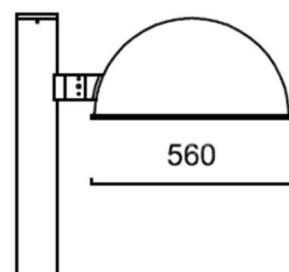

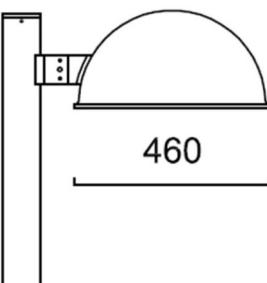

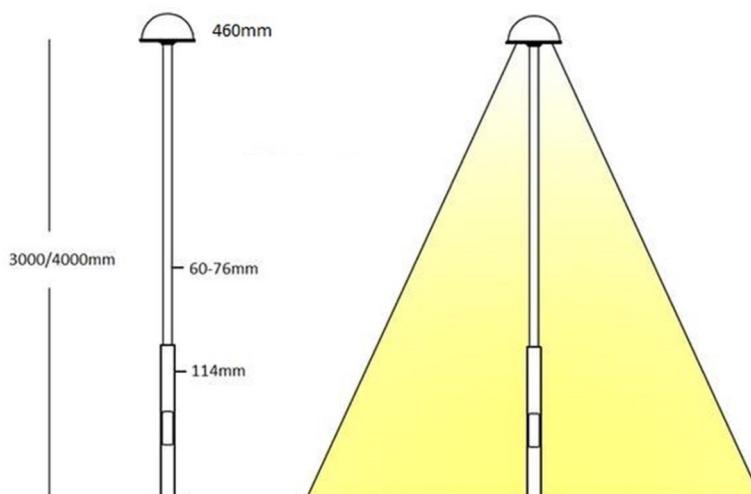

## SIUS

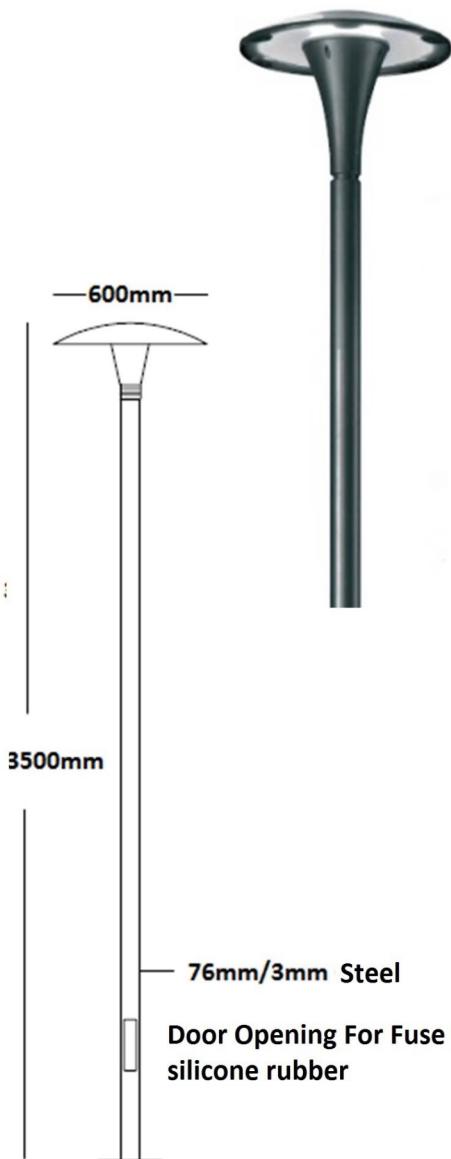

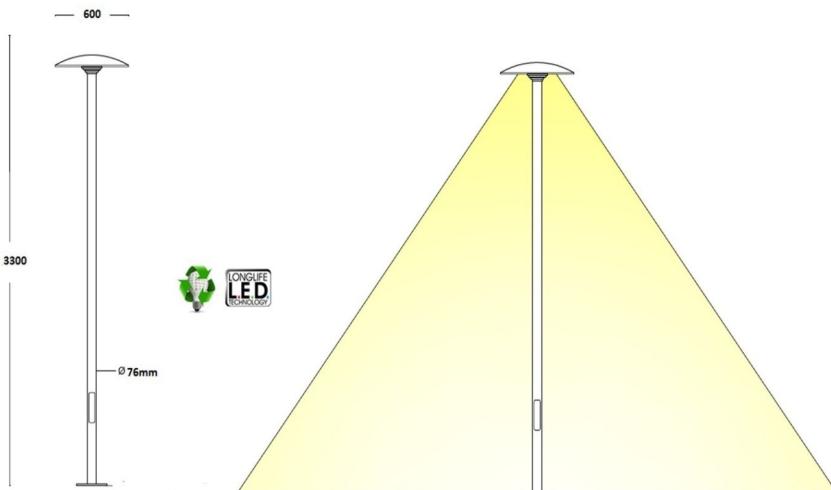

### Key Features:

- Housing constructed of corrosion resistant aluminum.
- Easy installation and maintenance.
- Cover made of clear single-pane tempered safety glass.
- Reflector made from pure anodized aluminum.
- Full cut-off uniform lighting distribution.
- Excellent heat management.
- HID fixtures up to 250W and Lumicro 24-36-48pcs Led module.
- Protection rate Class I
- Ingress protection IP65
- Electrostatic painted housing.( Grey and Dark Grey colors standart) RAL colors upon request.
- Poles : 3000mm – 8000mm / Steel or Aluminium

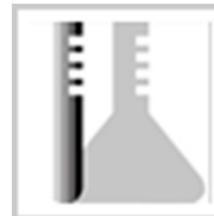

# LINEA

## Key Features:

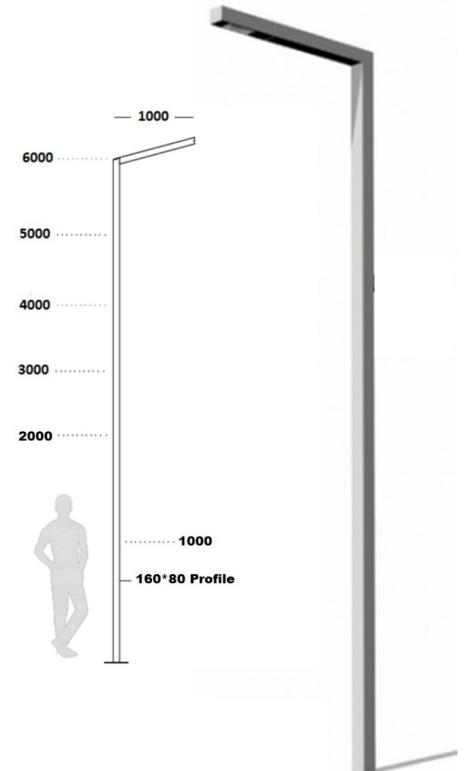

- Aluminium housing
- Easy installation and maintenance.
- Cover made of PMMA. Full cut-off uniform lighting distribution.
- Excellent heat management.
- 220/240 V - 50/60 Hz
- 50w / 6.500lm , 80W- 9600lm
- 3000 -4000-6500 Kelvin
- Protection rate Class I
- Ingress protection IP65
- Electrostatic painted housing.( Grey and Dark Grey colors standart) RAL colors upon request.
- Poles : 3000mm – 6000mm / Steel or Aluminium

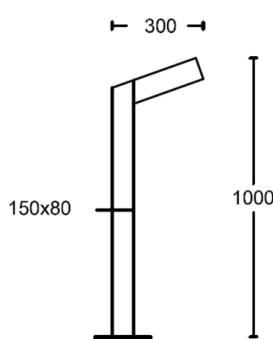

# HUMA

## KEY FEATURES

- 160x80 Steel Profile, Electro or Hot Dip Galvanize and Painted with electrostatic paint. (RAL Colours)
- Anchor Bolts included. Bottom Cover is optional.
- Power LED including driver and switch.
- Polycarbonate LENS (Provides No Light Loses)
- Fuse Door with allen screw.
- Electric Protection: Class I
- Lifetime: 50.000 hours.
- IP66

# SATURN

## KEY FEATURES:

- Aluminium Body.
- Bolts are stainless steel.
- Long Life silicone rubber.
- Special Louvre System in the fixture, prevents glare and provides efficiency increasing.
- Electrical internal connection is provided by silicone cable which has resistance to heat.
- IP68 Stainless Sleeve provides leaktightness.
- All components have CE, VDE, ENEC certificates.
- Using special design diffuser provide to resist heat and impact.
- Compact fluorescent lamps compatible 35-70W metal halide lights.
- Lamp Holder E27 and G12
- Electrical Protection: "CLASS I"
- IP 65.
- Using from lamp holder to fuse 3x1,5mm<sup>2</sup> TTR cable and earthing line.
- Pole 3-4 meter stepped and round sectional.
- Electrostatic polyester paint. (RAL Colours)
- Pole hot dip galvanize.

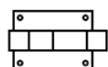

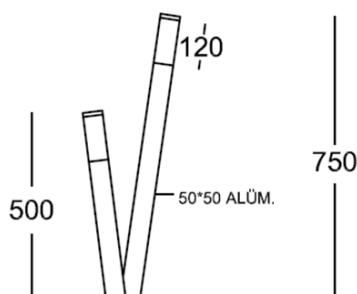

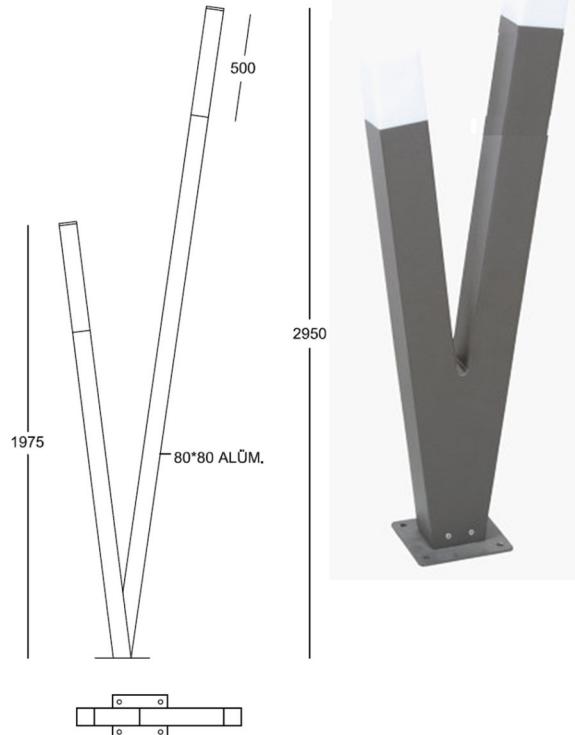

## TERRA DUO TYPE 1

### KEY FEATURES

- 80x80mm Aluminium Profile Body.
- Opal or satine diffuser maximum light transmittance.
- All bolts are stainless steel. Long Life silicone rubber.
- IP 68 Sleeve.
- Welded but no welding view on the body.
- Easy to manage of control unit. Compact fluorescent lamp (2\*36W–2G11) or compatible of Led technology.
- Produce variant height.
- Electric Protection: "CLASS I"
- IP 55.
- From Holder to fuse 3x1,5mm<sup>2</sup> TTR cable and earthing system.
- All electrical components have CE, VDE, ENEC certificates.
- Electrostatic Painting (RAL Colours)

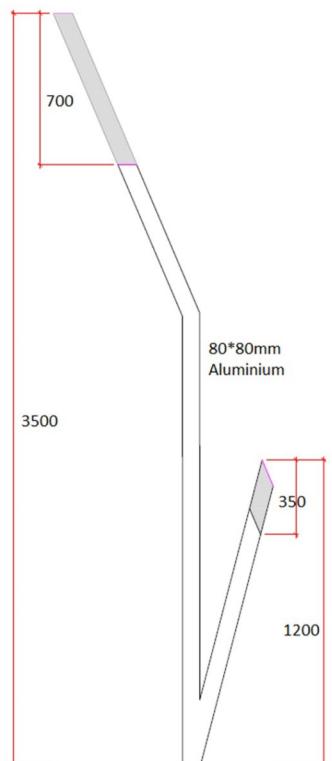

## TERRA DUO TYPE 2

### KEY FEATURES

- 80x80mm Aluminium Profile Body.
- Opal or satine diffuser maximum light transmittance.
- All bolts are stainless steel. Long Life silicone rubber.
- IP 68 Sleeve.
- Welded but no welding view on the body.
- Easy to manage of control unit. Compact fluorescent lamp (2\*36W–2G11) or compatible of Led technology.
- Produce variant height.
- Electric Protection: "CLASS I"
- IP 55.
- From Holder to fuse 3x1,5mm<sup>2</sup> TTR cable and earthing system.
- All electrical components have CE, VDE, ENEC certificates.
- Electrostatic Painting (RAL Colours)

# BOLLARDS

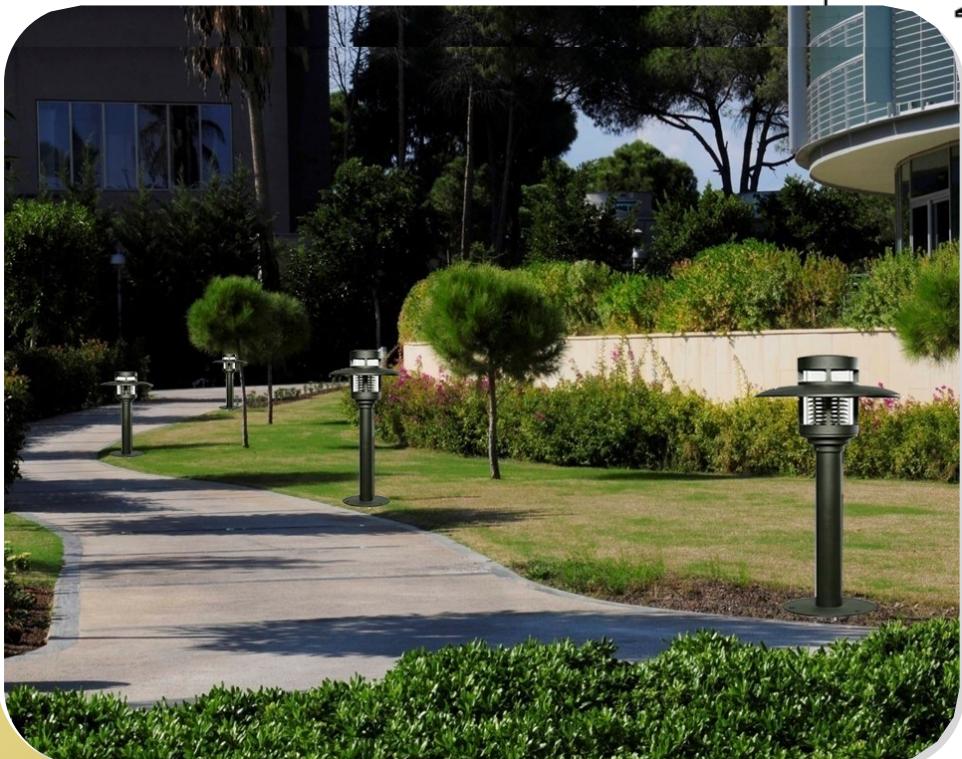

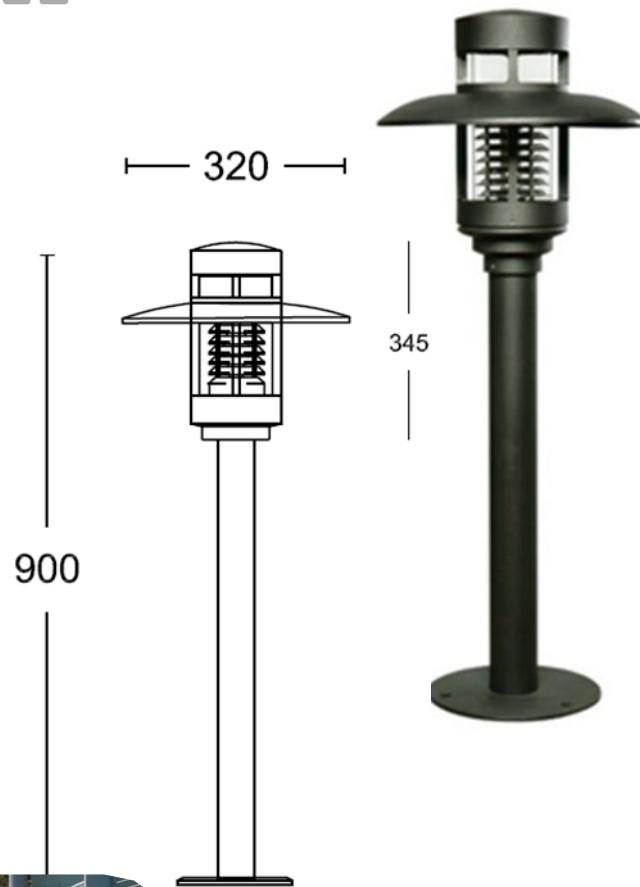

# SATURN

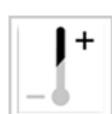

## MINI

### Key Features

- ⇒ Aluminium body.
- ⇒ Fixture head aluminium coating.
- ⇒ All fasteners stainless.
- ⇒ Long life silicone rubber.
- ⇒ IP68 Sleeve.
- ⇒ PMMA transparent diffuser.
- ⇒ Louvre System prevents glare inside of fixture and provides homogenous light distribution.
- ⇒ E27 Lamp Holder.
- ⇒ Electric Protection Class: "CLASS 1"
- ⇒ IP 55.
- ⇒ Earthing System from Lamp holder to fuse.

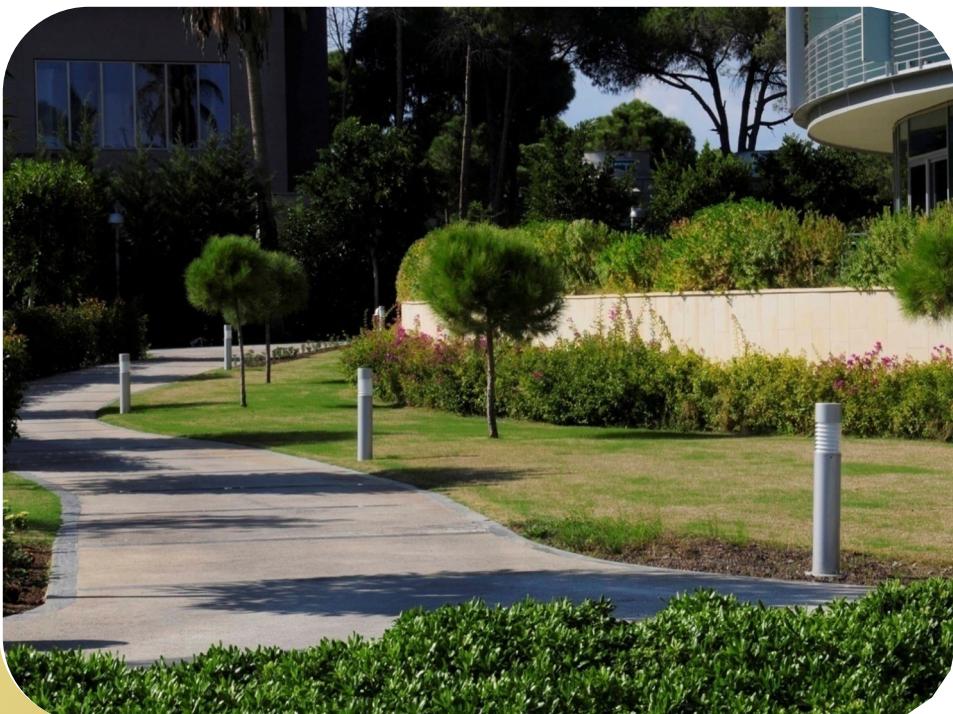

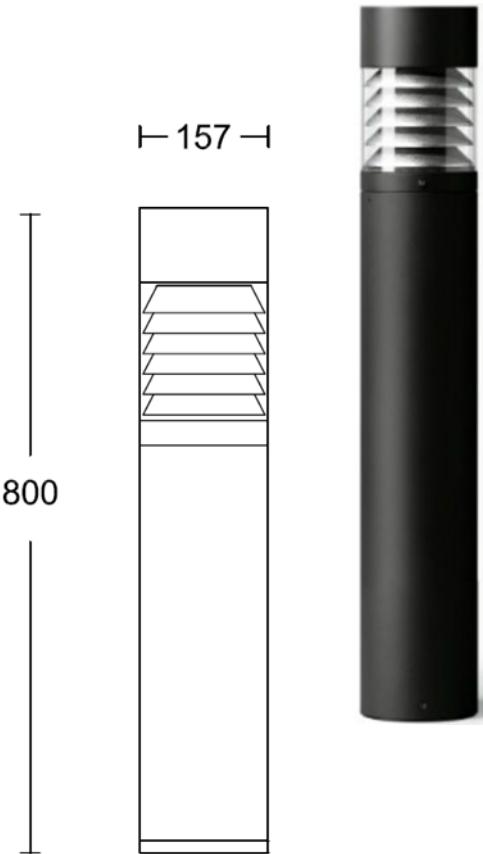

IP55

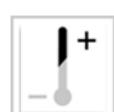

# NERO

## Key Features

- ⇒ Aluminium body.
- ⇒ Fixture head aluminium coating.
- ⇒ All fasteners stainless.
- ⇒ Long life silicone rubber.
- ⇒ IP68 Sleeve.
- ⇒ PMMA transparent diffuser.
- ⇒ Louvre System prevents glare inside of fixture and provides homogenous light distribution.
- ⇒ E27 or G24 Lamp Holder.
- ⇒ Electric Protection Class: "CLASS 1"
- ⇒ IP 55.
- ⇒ Earthing System from Lamp holder to fuse.
- ⇒ CE, VDE, ENEC.

IP55

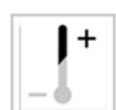

# TUBE

## Key Features

- ⇒ Aluminium body.
- ⇒ Fixture head aluminium coating.
- ⇒ All fasteners stainless.
- ⇒ Long life silicone rubber.
- ⇒ All Inside electrical connections with silicone rubber.
- ⇒ IP68 Sleeve.
- ⇒ PMMA transparent diffuser.
- ⇒ 360 degree light distribution.
- ⇒ Suitable for LED, Florescence light bulb.
- ⇒ Electric Protection Class: "CLASS 1"
- ⇒ IP 55.
- ⇒ Bollard height between 80cm and 4m.
- ⇒ Bollard diameter 150mm and 200mm optional.
- ⇒ CE, VDE, ENEC.

IP55

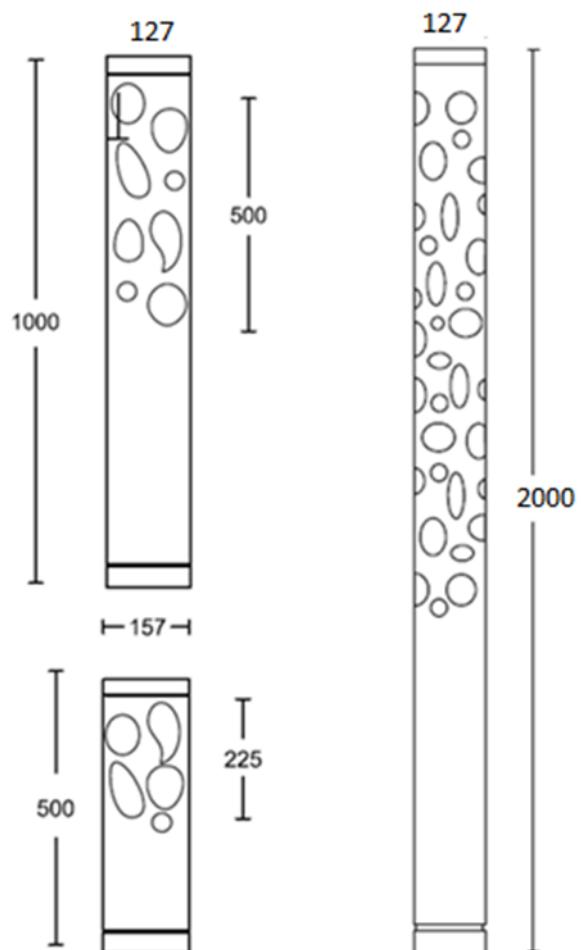

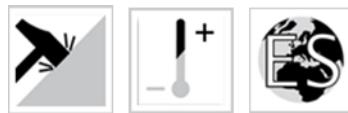

# HERMES

## Key Features

- ⇒ Aluminium body.
- ⇒ Fixture head aluminium coating.
- ⇒ All fasteners stainless.
- ⇒ Long life silicone rubber.
- ⇒ All Inside electrical connections with silicone rubber.
- ⇒ IP68 Sleeve.
- ⇒ PMMA transparent diffuser.
- ⇒ 360 degree light distribution.
- ⇒ Suitable for LED, Florescence light bulb.
- ⇒ Electric Protection Class: "CLASS 1"
- ⇒ IP 55.
- ⇒ Bollard height between 80cm and 4m.
- ⇒ Bollard diameter 150mm and 200mm optional.

IP55

# ALBA

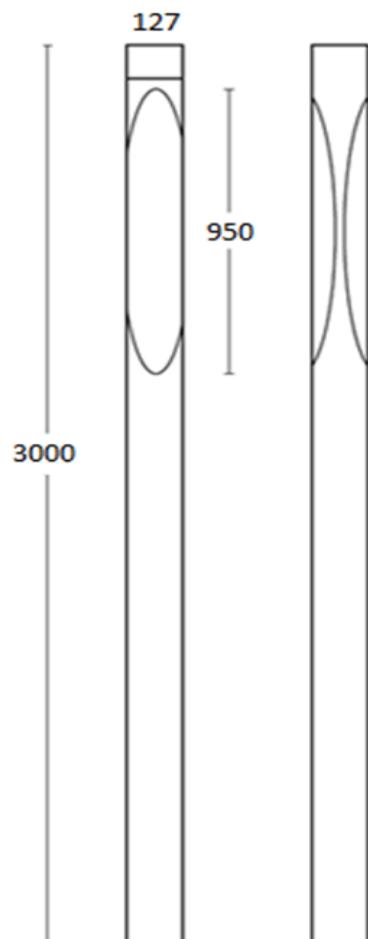

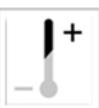

## Key Features

- ⇒ Aluminium body.
- ⇒ Fixture head aluminium coating.
- ⇒ All fasteners stainless.
- ⇒ Long life silicone rubber.
- ⇒ All Inside electrical connections with silicone rubber.
- ⇒ IP68 Sleeve.
- ⇒ PMMA transparent diffiuser.
- ⇒ 360 degree light distribution.
- ⇒ Suitable for LED, Florescence light bulb.
- ⇒ Electric Protection Class: "CLASS 1"
- ⇒ IP 55.
- ⇒ Bollard height between 80cm and 4m.
- ⇒ Bollard diameter 150mm and 200mm optional.
- ⇒ CE, VDE, ENEC.

IP55

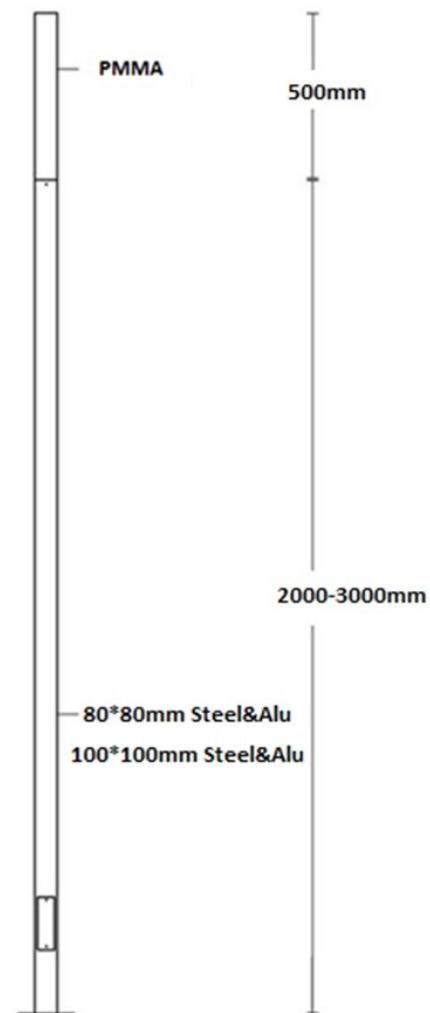

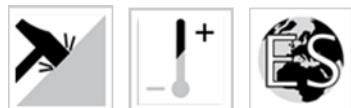

# TERRA

## Key Features

- ⇒ Aluminium body.
- ⇒ Fixture head aluminium coating.
- ⇒ All fasteners stainless.
- ⇒ Long life silicone rubber.
- ⇒ All Inside electrical connections with silicone rubber.
- ⇒ IP68 Sleeve.
- ⇒ PMMA transparent diffuser.
- ⇒ 360 degree light distribution.
- ⇒ Suitable for LED, Florescence light bulb.
- ⇒ Electric Protection Class: "CLASS 1"
- ⇒ IP 55.
- ⇒ Bollard height between 80cm and 4m.
- ⇒ Bollard diameter 150mm and 200mm optional.
- ⇒ CE, VDE, ENEC.

IP55

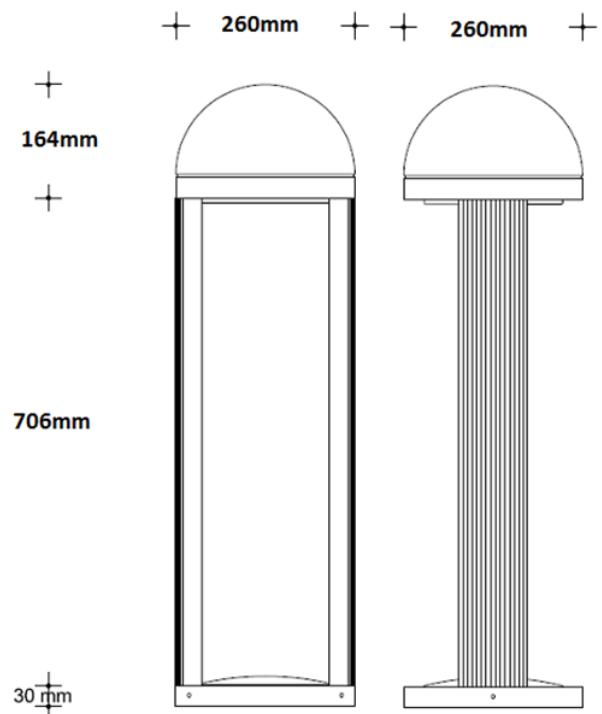

# Optik

## DUO

### Key Features

- ⇒ Aluminium body.
- ⇒ Fixture head aluminium coating.
- ⇒ All fasteners stainless.
- ⇒ Long life silicone rubber.
- ⇒ All Inside electrical connections with silicone rubber.
- ⇒ IP68 Sleeve.
- ⇒ PMMA transparent diffuser.
- ⇒ 120 degree light distribution.
- ⇒ Suitable for LED, Florescence light bulb.
- ⇒ Electric Protection Class: "CLASS 1"
- ⇒ IP 55.
- ⇒ Bollard height between 80cm and 4m.
- ⇒ Bollard diameter 150mm and 200mm optional.

# ELECTRIC

# BOARDS & PANELS

# tedaş tipi panolar

## *tedas type panels*

### **dahili tip panolar\_**

Standartlar ve şartnamelerde belirtilen tüm özelliklere uygun olarak imal edilen bu tip panolar bina içerisinde, kapalı bölgelerde tercih edilirler. Fabrikamızda IP 43 koruma sınıfında imal edilirler.

### *indoor type panels \_*

*These types of panels which are manufactured in line with all the properties mentioned in the standard and specifications are preferred within buildings and closed areas. They are manufactured in IP 43 protection class in our factory.*

— 26

### **saha dağıtım kutuları\_**

Alçak gerilim dağıtım şebekelerini beslemek için kullanılırlar. Şartnamesinde ve eklerinde belirtilen tüm özelliklere uygun olarak imal edilir ve imalat sürecinden sonra gerekli tüm deneyleri yapılarak fabrikamızdan sahaya gönderilirler.

### *cable distribution cabinets (cdc)\_*

*They are used so as to feed low voltage distribution networks. They are manufactured in compliance with all the properties mentioned in their specification and annexes; all necessary tests are conducted after the manufacturing process and they are sent from our factory to the site.*

## harici tip panolar\_

Standartlar ve şartnamelerde belirtilen tüm özelliklere uygun olarak imal edilen bu tip panolar üzerine yağış alan bölgelerde, dış ortamlarda kullanılır. Çatıları yağmur ve kar sularının birikmesini engelleyecek yapıdadır. IP koruma sınıfları yüksektir, fabrikamızda IP 54 koruma sınıfında imal edilirler.

## outdoor type panels\_

*These types of panels, which are manufactured in compliance with all properties mentioned in the standards and specifications, are used outdoors, in regions which receive rain. They have roofs which prevent accumulation of rain and snow water. They have high IP protection classes. They are manufactured in IP 54 protection class in our company.*

# özel tip panolar

## *customized panels*

### **şебеke-jeneratör panoları**

Şebekelerde enerji kesildiğinde jeneratörü devreye sokarak enerji sürekliliğini sağlamak amacıyla kurulan sistemlerde kullanılırlar. Şebekе ve jeneratör giriş TMŞ'si arasında bir elektriksel ve mekaniksel kilit kurularak şebekе ve jeneratör arasındaki geçiş sistemi kurulmuş olur.

### *network-generator panels*

*They are used in systems established so as to ensure energy continuity by activating the generator when energy is cut off in networks. A transition system is established by creating an electrical and mechanical lock between the network and generator incoming thermal magnetic circuit breaker.*

— 28

### **plc panoları**

Kontrol sistemleri, seri imalat sistemleri, montaj sistemleri gibi otomasyon gerektiren tüm sistemlerde kullanılırlar.

### *plc panels*

*They are used in all systems that require automation such as control systems, serial manufacture systems and assembly systems.*

## motor kumanda panoları(mcc) \_

Açılımı; Motion Control Chart , hareket kontrol sistemleri programlama tekniğidir.. 3 faz motorlara direk, yıldız-üçgen veya soft starter kumanda devresiyle yol vermek amacıyla imal edilen panolardır..

## engine control panels \_

*In other words, it can be expressed as Motion Control Chart, which is a programming technique for motion control systems. They are panels which are manufactured so as to give way to 3-phase engines with direct, star-triangle or soft starter control circuit.*

## sulama panoları\_

Tarımsal sulama yapmak amacıyla kurulan sistemlerde tüm arazi şartlarına uygun olarak üretilen panolarıdır.

## irrigation panels \_

*They are panels that are produced in line with all outdoor conditions in systems established for agricultural irrigation purposes.*

— 30

## sac köşkler\_

Beton köşklerle kıyaslandıklarında daha hafif olması, montaj ve nakliye kolaylığı sağlama nedeniyle tercih edilirler. İçerisinde kullanılacak produktlere göre imal edildikleri için ölçülerini oldukça farklılık gösterebilir.

## sheet metal kiosks \_

*They are preferred for being lighter compared to concrete kiosks and as they offer ease of assembly and shipment. As they are manufactured in line with the products in which they will be used, their dimensions can vary considerably.*

## kompanzasyon panoları\_

İndüktif ve kapasitif etkiler nedeniyle voltaj ve akım sinyalleri arasındaki faz kaymasını düzelterek ideale yakın (0 derecede) sabit tutmaya yarayan sistemlerde kullanılmak üzere imal edilirler.

## compensation panels \_

*They are manufactured to be used in systems that enable fixation at the ideal degree (0 degrees) by correcting the phase shifting between voltage and current signals due to inductive and capacitive effects.*

## cam elyaf takviyeli polyester panolar \_

Panoların karkaslarının cam elyaf takviyeli polyester olması öncelikle panonun tüm dış kısmının izole olması demektir. Bu özelliği ile can güvenliği açısından metal muhafazalı panolara göre avantajlıdır. Estetik görüntüsü, modüler tasarım ve kullanım rahatlığı da tercih sebeplerindendir. Paslanma yapmadığından nemli bölgelerde daha fazla tercih edilir.

## glass fiber-reinforced polyester panels \_

*Glass fiber-reinforced polyester panel framework means isolation of the whole surface of the panel in the first place. This property makes it more advantageous in terms of life safety compared to metal-enclosed panels. Its aesthetic appearance and ease of use are also reasons for preference.*

— 32

## og sekonder koruma panosu \_

Prensibi OG'nin sekonder kısmında aşırı akım koruması, toprak aşırı akım koruması, dengesizlik koruması vb. olan panolardır.

## mv secondary protection panel \_

*These are panels the principle of which is excessive current protection in secondary part of MV, earth excessive current protection and imbalance protection etc.*

## **siva altı ve siva üstü tablolar\_**

*flush-mounted and  
surface-mounted tables\_*
